5. Why Others Did Not Make the Cut

Out of 172 candidates assessed, 152 did not make the shortlist. Representative no-hire cases are shown in the master table above (Section 1). Key patterns across the broader pool:

#	Pattern Across No-Hire Pool
1	No field M&E; experience — largest group: community mobilisers, teachers, admin officers without research methodology exposure.
2	No education sector exposure — FMCG, HR, marketing, corporate backgrounds with no school or NGO fieldwork.
3	Wrong functional background — IT, data entry, finance candidates who applied to the wrong role.
4	Location outside Islamabad, not willing to relocate — deal-breaker per screening criteria.
5	Scanned/unreadable CVs with insufficient recoverable text — could not be scored; flagged in chat.
