Screening Report — Soul Architect / Conversational UX Designer

Job ID: 26 | Screened: 42 candidates | Shortlisted: 9 | Budget: Not Set | 06 March 2026

42	9	1	2	6	33	Not Set
Total Screened	Shortlisted	Tier A (85+)	Tier B (70–84)	Tier C (55–69)	No-Hire (<55)	Budget

Deep Comparative Analysis

Master table covers all 42 screened candidates. Scores use the 12-step 7-dimension framework (0–100). Budget column shows 'Not Set' as no salary range was configured for this posting.

#	Candidate	Score	Tier	Exp. Salary	Background / Current Role	Org Signal	Budget	Key Strength / Note	Key Gap / Why Not Proceed	Verdict
1	Hulalah Khan	88.0	Tier A	PKR 1 60,000	College Counsellor / Researcher · Karachi → relocating	TCF ★, LUMS	Not Set	ONLY Sociology-Anthropology + Psychology candidate in pool (LUMS, CGPA 3.5); TCF curriculum dev; conducted 10+ anonymous counselling sessions; led 3,000-member mental health community; Q1 answer — 'confessional without a face' — deepest human-AI insight in pool; qualitative research methods coursework	Limited AI tool fluency (ChatGPT + Gemini only); no prior AI product experience	RECOMMEND
2	Danyal Haroon	82.0	Tier B	PKR 2 50,000	UX Design Specialist → MA Digital Media (Manchester) · Islamabad	AIO App Inc. (AI product) ★, LUMS, HBL	Not Set	MA dissertation on 'Evolution and Impact of AI Chatbot Interfaces' (Manchester); designed AI-powered restaurant platform at AIO ($1M funding) — competitor AI product experience; conducted focus groups across 18 cities at HBL Konnect (1M+ users, 20% step reduction); uses Gemini Deep Research, ChatGPT, Claude, DALL-E, Figma AI daily	CS/Digital Media background — not behavioral science per JD must-have; Q1 journalistic rather than anthropological in depth	INTERVIEW
3	Asma Butt	76.0	Tier B	PKR 4 00,000	Product Designer (UI/UX) · Lahore → relocating	TCP Software, Aladtec (60K+ users)	Not Set	Designed Talkit AI (AI recording sensitive doctor-patient consultations — directly mirrors Rumi's emotional-support challenge); Aladtec app hit Google Play Top 30 in Business; uses Figma Make, Google AI Studio, Perplexity; Q1 shows real ethical depth around AI in vulnerable human conversations	Not a behavioral science background per JD must-have; PKR 400K stretches unset budget; Q2 is product-analytical, not philosophical	INTERVIEW

#	Candidate	Score	Tier	Exp. Salary	Background / Current Role	Org Signal	Budget	Key Strength / Note	Key Gap / Why Not Proceed	Verdict
4	Arslan Saleem	68.0	Tier C	PKR 5 50,000	Lead UX/UI Designer (9 yrs) · Lahore → relocating	Alivia Analytics (AI healthcare SaaS), Genesis AI	Not Set	9+ years UX; currently leading AI product UX at Alivia Analytics (X-Ray Analysis AI, Policy Advisor AI); Q1 shows genuine enterprise AI ethics thinking ('humans project confidence, frustration, gratitude onto systems'); good AI tool stack (ChatGPT, Figma AI, Notion AI)	PKR 550K — highest salary in pool; B.Com degree (not human sciences); no education/EdTech background	CONSIDER
5	Rimsha Faisal	65.0	Tier C	PKR 2 50,000	Product Designer · Rawalpindi/Islamabad	AIO App Inc. ★ (same AI platform as Danyal), Payactiv	Not Set	Co-led design system at AIO (AI restaurant platform) — same company as #2 Danyal, direct competitor AI product exposure; uses Claude as 'design co-pilot'; Figma Make + Lovable; FAST-NUCES Dean's Honor List; Q2 shows cultural sensitivity framing	Q1 (teddy bear) is most superficial in shortlist for this philosophical role; no behavioral science or qualitative research background	CONSIDER
6	Talal Hassan Khan	60.0	Tier C	PKR 1 30,000 -150,0 00	Software Eng. / UI UX Designer · Islamabad	CodexCue ML Internship	Not Set	ML internship background (built tip/spam/car prediction models); COMSATS CGPA 3.83; Q1 thoughtful on human-AI cognitive partnership; very affordable salary; full-stack + UX hybrid	Primarily a software engineer, not a behavioral scientist or soul designer; Q2 answer brief and surface-level; no education background	LOW PRIORITY
7	Muhammad Taufeeq	58.0	Tier C	PKR 2 30,000	Senior Product Designer / UX Writer · Rawalpindi	Devsky, Fexen Solutions	Not Set	UX Writing specialization — one of the most directly relevant skills for crafting Rumi's voice; uses Claude for design; Figma Make + Lovable + Framer; 5 years experience in Fintech/SaaS	Q1 extremely shallow ('sometimes it understands my questions very well'); no behavioral science; fintech/Web3 focus not education-adjacent	LOW PRIORITY
8	Ahmad Hamdan Akram	58.0	Tier C	PKR 2 00,000	UI/UX Researcher + Research Consultant · Islamabad	FixelCloud (Fortune 500 clients: Walmart, Hilton, Amex), Developers Den	Not Set	Built voice bot with NLP + Twilio at Developers Den (conversational AI experience); improved design efficiency 30% at FixelCloud serving Fortune 500; uses ChatGPT, Claude, Gemini, Perplexity, Notion AI	Q1 (cat story) charming but not philosophically deep; CS background not behavioral science; disclosed Q3 answer was polished by ChatGPT	LOW PRIORITY
9	Zia Ullah	55.0	Tier C	PKR 1 70,000	Senior UI/UX & Product Designer (8+ yrs) · Islamabad	SkyElectric (SmartFlow AI platform), UnitedSol	Not Set	Led AI platform UX at SkyElectric (SmartFlow AI); 8+ years cross-domain UX; affordable salary; Best Performer award	Q1 very shallow (2-sentence pet story); skipped JD Question 2 entirely (cultural analysis of Rumi's proactive outreach — the exact design question this role addresses); no qualitative research background	LOW PRIORITY
10	Muhammad Abdullah Safdar	48.0	No-Hire	PKR 1 70,000	Product Designer | Visual Designer · Rawalpindi	Ideation Tec. (Jazz, Telenor, Zong apps)	Not Set	Telecom apps at scale (Jazz, Telenor, Zong — millions of users); AI tools: Midjourney, Flux AI, ChatGPT, Loveable	■ DID NOT ANSWER JD screening questions — critical red flag for writing-intensive Soul Architect role; no behavioral science or qualitative research	NO-HIRE
11	Hamza Ahmed	45.0	No-Hire	PKR 1 30,000	Product Designer · Islamabad	GrowthRune (Simming AI platform audit)	Not Set	UI/UX audit for Simming AI platform; works directly with product/engineering; affordable salary	■ DID NOT ANSWER JD screening questions — critical red flag for writing-intensive role; no behavioral science	NO-HIRE
12	Hadia Sajjad	40.0	No-Hire	PKR 1 60,000	Industrial Designer / UX Designer · Islamabad	RAPIDS AI (Design Manager)	Not Set	NUST background; led design at RAPIDS AI; managed 3D + UI/UX across projects	■ DID NOT ANSWER JD screening questions; Industrial Design background misaligned with Soul Architect requirements; no behavioral science or qualitative research	NO-HIRE

#	Candidate	Score	Tier	Exp. Salary	Background / Current Role	Org Signal	Budget	Key Strength / Note	Key Gap / Why Not Proceed	Verdict
13	Muhammad Jaffer	30.0	No-Hire	$1,450 /month	Product Designer / Fintech UX Expert · Rawalpindi	Neem (fintech), UBL, NBP	Not Set	5+ years fintech UX; UBL & NBP mobile apps; Islamabad-based	■ Answered JD screening Q1 and Q2 with a single period '.' — absolute disqualifier for a writing-intensive Soul Architect role; fintech-only background	NO-HIRE
14	Aaqib Khan	53.8	No-Hire	PKR 2 50,000	UX Designer · Islamabad	Microsoft	Not Set	UX background; strong environment fit	No AI tools; no qualitative research — just below shortlist threshold	NO-HIRE
15	Muhammad Ali	52.5	No-Hire	$1,500 /month	UX/Graphic Designer · Islamabad (currently abroad)	—	Not Set	ChatGPT/Claude tool awareness	Zero demonstrated outcomes; no qualitative research background	NO-HIRE
16	Zikra Fiaz	52.5	No-Hire	PKR 2 00,000	UX Researcher · Rawalpindi (Twin Cities)	Google	Not Set	Strong ownership signals; UX research label; already in Twin Cities	No AI fluency; limited outcomes evidence	NO-HIRE
17	Muhammad Taimoor	50.0	No-Hire	PKR 1 20,000	Conversational UX Designer · Islamabad	—	Not Set	Conversational UX title — rare and relevant signal noted	No AI tools; no quantified outcomes; limited evidence of execution	NO-HIRE
18	Nain Tara	47.5	No-Hire	PKR 2 00,000	UX Designer · Islamabad	—	Not Set	Some chatbot tool exposure; ownership indicators	Limited functional depth; zero demonstrated outcomes	NO-HIRE
19	Ghulam Qadir	46.8	No-Hire	PKR 4 50,000	Designer · Karachi → relocating	—	Not Set	ChatGPT/Claude tools; strong environment fit	Missing must-have: no human sciences background; penalty applied; high salary	NO-HIRE
20	Zehra Rashid	44.6	No-Hire	PKR 3 25,000	UX Researcher · Islamabad	—	Not Set	UX research label; Islamabad-based	Zero outcomes evidence; no AI tools; missing must-have penalty	NO-HIRE
21	Asad Nawaz	42.5	No-Hire	PKR 4 50,000	Designer · Islamabad → relocating	—	Not Set	Prompt engineering fluency	Missing must-have: human sciences background absent; high salary	NO-HIRE
22	Hamza Jamal	42.5	No-Hire	Negotiable (current: PKR 5 20,000)	Designer · Lahore → relocating	—	Not Set	ChatGPT/Claude tools; willing to relocate	Missing must-have; limited functional depth; current salary very high	NO-HIRE
23	Manahil Ahmed	40.4	No-Hire	PKR 1 20,000	UX Researcher · Islamabad	—	Not Set	UX research label; Islamabad-based; affordable	No outcomes evidence; no AI tools; missing must-have penalty	NO-HIRE
24	Muhammad Ibrahim Khan	38.8	No-Hire	PKR 75,000	UX Researcher · Islamabad	—	Not Set	UX research label; very affordable	Weak ownership; low environment fit signal; minimal evidence	NO-HIRE
25	Muhammad Ammar Khan	37.0	No-Hire	PKR 1 00,000	CS Graduate / AI-Assisted Designer · Rawalpindi	Szabist	Not Set	■ SURPRISE FLAG — JD answers far exceed CV score. Q1: 'permission to wonder out loud... non-human things are rehearsal spaces for being human' — most philosophically sophisticated in pool. Uses Claude+ChatGPT as 'thinking partners not answer engines'. Profile explicitly mentions 'human-AI relationships, behavior-driven design, culturally responsive experiences' — this IS the job description. PKR 100K = most affordable candidate.	Fresh grad; thin professional experience (no full-time UX role yet); CV keyword score 37 — well below shortlist threshold	NO-HIRE
26	Aisha Bashir	37.2	No-Hire	PKR 2 50,000 -300,000	Designer · Karachi (not relocating)	—	Not Set	Writing signal; ChatGPT/Claude tools	Not willing to relocate; missing must-have: human sciences background absent	NO-HIRE

#	Candidate	Score	Tier	Exp. Salary	Background / Current Role	Org Signal	Budget	Key Strength / Note	Key Gap / Why Not Proceed	Verdict
27	Muhammad Wasi Haider	36.1	No-Hire	PKR 30,000-50,000	UX Designer · Rawalpindi	—	Not Set	UX design label; very affordable	Missing must-have; no AI tools; no outcomes evidence	NO-HIRE
28	Syed Manan Ali	36.1	No-Hire	PKR 45,000	UX Designer · Rawalpindi (not relocating)	—	Not Set	UX design baseline; very affordable	Not willing to relocate; missing both must-have criteria; no AI tools	NO-HIRE
29	UIxFly (Moheed)	35.1	No-Hire	Flexible	UI/UX Portfolio · Islamabad (not relocating)	—	Not Set	Portfolio-based application; Islamabad-based	Not willing to relocate to HQ; missing both must-have criteria	NO-HIRE
30	Sameen Ali	32.9	No-Hire	PKR 220,000	UX Designer · Islamabad → relocating	—	Not Set	Writing signal noted; Islamabad	Missing must-have; very low environment fit	NO-HIRE
31	Muhammad Ali (II)	32.9	No-Hire	PKR 120,000	UX Designer · Rawalpindi → relocating	—	Not Set	Affordable; willing to relocate	Missing must-have; no outcomes or AI evidence	NO-HIRE
32	Majid Raffique	31.9	No-Hire	60+ (unclear currency)	UX Designer · Islamabad → relocating	—	Not Set	UX design label	Missing must-have; very limited relevant signal; salary unclear	NO-HIRE
33	Sholmiyat Adnan	28.7	No-Hire	PKR 40,000	Designer · Islamabad → willing	—	Not Set	ChatGPT/Claude tool awareness; very affordable	Missing must-have; very limited relevant evidence	NO-HIRE
34	Sanaullah Mukhtar	26.6	No-Hire	PKR 150,000	Designer · Islamabad → relocating	—	Not Set	Design thinking label; affordable	Missing must-have; insufficient background for this role	NO-HIRE
35	Saad Sajid	26.6	No-Hire	60 (unclear currency)	UX Designer · Islamabad → relocating	—	Not Set	UX design label; Islamabad-based	Missing must-have; insufficient background for this role; salary unclear	NO-HIRE
36	Ameer Hamza Tariq	22.0	No-Hire	PKR 350,000	Product Designer / Design Lead · Islamabad	Productbox, Evolv Technology (US)	Not Set	■ SURPRISE FLAG — Best Q2 in pool: 'personalismo', 'digital fatigue', 'false alarm vs churn signal' — sophisticated cross-cultural AI soul design terminology. Q1: Witcher 3 soul design analysis directly maps to designing Rumi. Uses Figma Make + Lovable.dev + Framer — actually builds functional prototypes. International role at Evolv Technology (MA, USA).	CV score 22 — no behavioral science background; salary PKR 350K; low CV keyword match; no education sector experience	NO-HIRE
37	Saad Imran	18.1	No-Hire	70 (unclear currency)	Designer · Wah Cantt (not relocating)	—	Not Set	—	Missing both must-have criteria; not relocating; salary unclear	NO-HIRE
38	Hassan Bin Tariq	12.6	No-Hire	PKR 300,000	Designer · Rawalpindi → relocating	—	Not Set	—	Missing both must-have criteria; completely misaligned profile	NO-HIRE
39	zennab (LinkedIn)	10.0	No-Hire	Not mentioned	LinkedIn applicant — no CV submitted	—	Not Set	—	No CV submitted via LinkedIn; unscreenable	NO-HIRE
40	wajihazainab (LinkedIn)	10.0	No-Hire	Not mentioned	LinkedIn applicant — no CV submitted	—	Not Set	—	No CV submitted via LinkedIn; unscreenable	NO-HIRE
41	hamza (LinkedIn)	10.0	No-Hire	Not mentioned	LinkedIn applicant — no CV submitted	—	Not Set	—	No CV submitted via LinkedIn; unscreenable	NO-HIRE

#	Candidate	Score	Tier	Exp. Salary	Background / Current Role	Org Signal	Budget	Key Strength / Note	Key Gap / Why Not Proceed	Verdict
42	Faizan Ullah	8.1	No-Hire	PKR 1 20,000	Designer · Peshawar → relocating	—	Not Set	—	Missing both must-have criteria; lowest scorer in pool	NO-HIRE

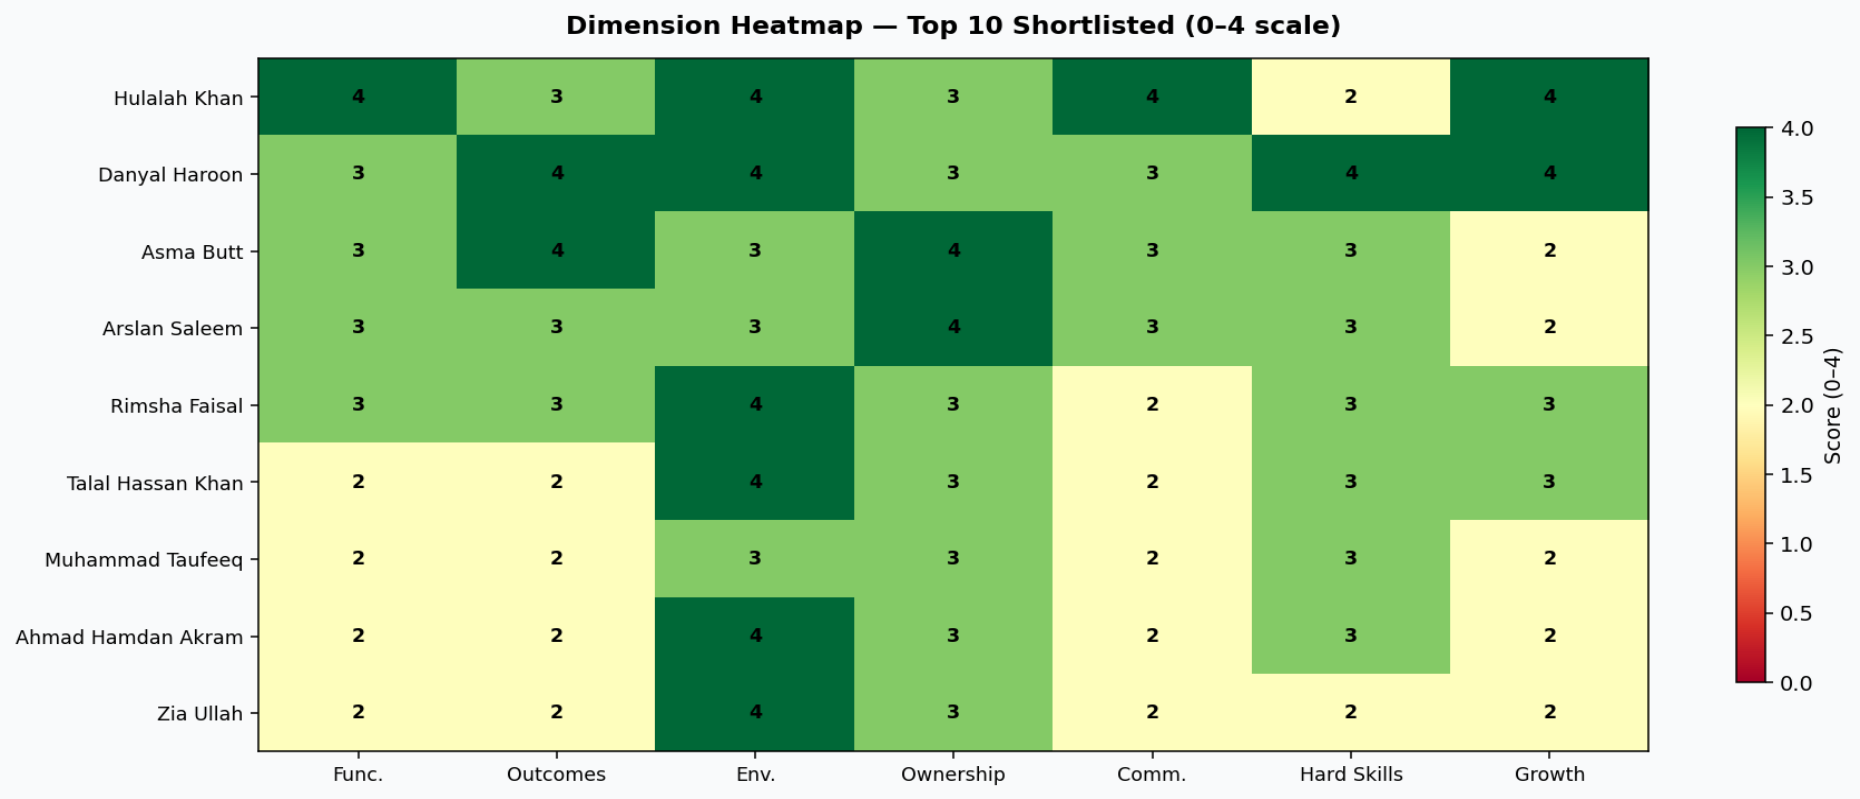
Out-of-Budget Flags

No salary budget was configured for this position. All candidates were screened on JD match, experience fit, and skills alignment only. Budget compatibility will need to be assessed during the interview stage. Please set a min/max budget range in the system for future postings to enable automated budget screening.

Dimension Heatmap — Top 10 Shortlisted

Each cell shows the raw dimension score (0–4). Weighted contributions: Functional Match 25% · Outcomes 20% · Environment 15% · Ownership 15% · Communication 10% · Hard Skills 10% · Growth 5%.



Why Others Didn't Make It

The 33 No-Hire candidates fell into five clear patterns. NOTE: Three candidates within the No-Hire pool showed JD answer quality that significantly exceeded their CV keyword scores — see Surprise Flags below.

Group 1 — Critical Red Flag: Did Not Answer JD Screening Questions

Candidates: Muhammad Abdullah Safdar · Hamza Ahmed · Hadia Sajjad · Muhammad Jaffer (answered Q1+Q2 with '.')
For a writing-intensive Soul Architect role, the application screening questions ARE the work sample. These 4 candidates either skipped all 3 questions entirely or submitted a single period as their response. A person who designs Rumi's voice and soul cannot demonstrate the thinking this role demands without engaging with these questions. Muhammad Jaffer's fintech UX experience (UBL, NBP) is solid, but his disengagement from the application questions is disqualifying.

Group 2 — Borderline (Score 50–54): Missed shortlist by a narrow margin

Candidates: Aaqib Khan · Muhammad Ali · Zikra Fiaz · Muhammad Taimoor
Had UX design background and some relevant signal, but lacked at least one critical element — either AI fluency or qualitative research depth. Muhammad Taimoor notably titled himself 'Conversational UX Designer' but provided insufficient execution evidence to cross the threshold.

Group 3 — Missing Must-Have Criteria (Score 40–49): No human sciences background

Candidates: Nain Tara · Ghulam Qadir · Zehra Rashid · Asad Nawaz · Hamza Jamal · Manahil Ahmed
All received the –15% must-have penalty: no training in behavioral science, anthropology, psychology, or sociolinguistics — which the JD explicitly calls out as critical. Asad Nawaz is a notable case: strong AI/prompt skills but zero human sciences grounding.

Group 4 — Weak Alignment (Score 30–39): Insufficient depth across dimensions

Candidates: Muhammad Ibrahim Khan · Aisha Bashir · Muhammad Wasi Haider · Syed Manan Ali · UIxFly (Moheed) · Sameen Ali · Muhammad Ali (II) · Majid Raffique · Muhammad Ammar Khan
Primarily visual or graphic designers with no evidence of conversational UX, behavioural science, or AI fluency. NOTE: Muhammad Ammar Khan (score 37 by CV) is flagged as a SURPRISE — see below.

Group 5 — Very Low Alignment or No CV (Score <30 / 10)

Candidates: Sholmiyat Adnan · Sanaullah Mukhtar · Saad Sajid · Ameer Hamza Tariq · Saad Imran · Hassan Bin Tariq · Faizan Ullah · zennab (LinkedIn) · wajihazainab (LinkedIn) · hamza (LinkedIn)
No meaningful alignment with the Soul Architect profile. Graphic/visual designers with no AI or research signal. LinkedIn applicants (zennab, wajihazainab, hamza) submitted no CV. NOTE: Ameer Hamza Tariq (score 22 by CV) is flagged as a SURPRISE — see below.

■ *Surprise JD Matches — Hidden Gems the CV Score Missed*

Two candidates scored very low on CV keyword screening but submitted application answers that are among the strongest in the entire pool for this specific role. We recommend reviewing these before finalising the shortlist.

Muhammad Ammar Khan	**CV score: 37 | Expected: PKR 100,000 | Rawalpindi** Q1 (human-AI relationship story): Most philosophically sophisticated answer in the entire pool — 'permission to wonder out loud... non-human things are rehearsal spaces for being human.' Captures exactly the existential depth this role demands. Q3 (AI tools): Uses Claude + ChatGPT as 'thinking partners rather than answer engines' — the precise orientation the JD describes. His About Me on the CV literally reads: 'human-AI relationships, behavior-driven design, culturally responsive experiences.' That IS the job description. **Why CV score was low:** Fresh graduate; thin professional experience; no deployed products yet. **Recommendation:** 30-min interview — cheapest candidate in pool at PKR 100K; potential raw talent that training could unlock.
Ameer Hamza Tariq	**CV score: 22 | Expected: PKR 350,000 | Islamabad** Q2 (Rumi's proactive outreach): Best cultural analysis in pool — uses terms like 'personalismo' (Latin American psychological concept), 'digital fatigue', 'false alarm vs churn signal' — showing cross-cultural AI soul design thinking at a level above most shortlisted candidates. Q1: Witcher 3 character design ('emotional subtext', 'micro-interactions', 'a non-human entity doesn't have to be perfect to feel authentic') — directly applicable framework for designing Rumi's soul. Q3: Uses Figma Make, Lovable.dev, Framer — actually builds functional prototypes, not just mocks. International experience at Evolv Technology (Massachusetts, USA). **Why CV score was low:** No behavioral science keywords; no education background. **Recommendation:** Send writing sample test. Cross-cultural soul design thinking is rare; this person may compensate for what the top-9 lack.

Next Steps

1. RECOMMEND — Hulalah Khan (Tier A, Score 88):	Only Sociology-Anthropology + Psychology candidate in pool (LUMS, CGPA 3.5). TCF curriculum development = direct EdTech peer signal. Provided the deepest human-AI philosophical insight in pool ('confessional without a face'). Her Q3 concern about 'using AI responsibly without biasing her work' is exactly the kind of self-aware AI relationship this role requires. Gap to probe in interview: AI tool experience — she uses ChatGPT + Gemini but has not built or shipped an AI product. Confirm she's comfortable with prompt engineering and AI agent workflows before hiring. Expected PKR 160,000 — likely most affordable Tier A candidate.
2. INTERVIEW — Danyal Haroon (Tier B, Score 82):	Strongest AI product experience: designed AI platform at AIO App Inc. ($1M funding); Manchester MA dissertation on AI chatbot interfaces. Conducted 18-city focus groups at HBL. Gap: CS/Digital Media background, not behavioral science per JD must-have. Q1 was more journalistic than anthropological. Key interview test: can he engage with the ethnographic depth this role needs, or is he purely a UI/UX executor? Expected PKR 250,000. NOTE: Rimsha Faisal (rank 5, PKR 250K) also worked at AIO App — same company as Danyal, corroborating the AI product signal.
3. INTERVIEW — Asma Butt (Tier B, Score 76):	Designed Talkit AI — a healthcare AI that records sensitive doctor-patient consultations. This is the closest analogue to Rumi's emotional support challenge in the entire pool. Her Q1 shows real ethical depth about AI in vulnerable human conversations. Uses Figma Make + Google AI Studio + Perplexity daily. Gap: not behavioral science; PKR 400K is the highest among interviewable candidates. Verify budget before inviting.
4. Tier C — Review Before Closing:	If Tier A/B interviews disappoint: Arslan Saleem (9 yrs, currently designing AI products at Alivia Analytics + Genesis AI — strongest seniority, but PKR 550K) and Rimsha Faisal (AIO AI product, uses Claude as design co-pilot, PKR 250K). Muhammad Taufeeq's UX Writing specialization is directly relevant for voice design at PKR 230K. Talal Hassan Khan is the most affordable Tier C candidate at PKR 130–150K.
5. Surprise Flags — Do Not Overlook:	Muhammad Ammar Khan (PKR 100K, No-Hire by CV) wrote the most philosophically sophisticated Q1 in pool and explicitly describes his interest as 'human-AI relationships, behavior-driven design, culturally responsive experiences' — this IS the job description. 30-minute interview is low-risk at PKR 100K. Ameer Hamza Tariq (PKR 350K) provided the best Q2 cultural analysis in pool — consider sending him a writing sample test to validate the quality.
6. Budget Disclosure:	No salary budget was configured for this role. Confirm budget range with Haroon Yasin before extending invitations. Salary range in this pool: PKR 100K (Ammar Khan) to PKR 550K (Arslan Saleem). Recommended budget for this role: PKR 150K–250K to access the top 3 shortlisted candidates.
7. Writing Sample — Take-Home Task:	Before final interview, request: 'Write 300 words describing Rumi's personality for a teacher in Lahore vs. a teacher in Lima — same soul, different expression.' This will reveal in 30 minutes what CVs and interviews cannot.
